ACCESS SERVICE

9.6 Wholesale Multicast Video Transport and High Speed Internet Packet Access (Cont'd)9.6.2 Service Qualification

Service Access to the Telephone Company's WMVT Connection Point will be provided over a data transport service where facilities permit. The Telephone Company will qualify the WMVT Service between the DEUL and the WMVT Connection Point. WMVT service will be provided where qualified, capable and available facilities exist.

The purpose of qualification is to determine the availability and limitations of the Telephone Company's WMVT Connection Points and outside plant facilities. Service will only be provided to End-Users of the retail video provider through local exchange or dedicated telephone services provided by the Telephone Company where facilities exist and technical capabilities permit. The actual data rates depend on a number of factors, including, but not limited to 1) the cable distance from the DEUL; 2) the type of facility; and 3) the physical condition of the plant.

9.6.3 Service Provisioning

WMVT Service is provisioned over existing Telephone Company facilities and may be purchased by a retail video provider meeting the terms and conditions described herein.

WMVT will be provisioned on Telephone Company facilities able to provide a minimum of 4.2Mbps downstream for a single video stream utilizing various technologies including, but not limited to ITU-T G.992.1, G.992.3, G.992.5 specifications for Asymmetrical digital subscriber line (ADSL). Where WMVT Service is available and has the capability of providing greater than 4.2Mbps downstream bandwidth, it will provide video stream(s) and up to one (1) high-speed data stream capable of providing internet access at download speeds up to 3.0Mbps and upload speeds up to 768kbps. The number of video streams and the capability of providing a high-speed data stream is dependent upon a number of factors, including but not limited to, available facilities, the type of facility, the cable distance from the DSLAM to the DEUL, the physical condition of the plant and the downstream bandwidth available to the DEUL. The bandwidth available for the video streams shall only be used for the provision of video programming services. WMVT Service cannot be provisioned over the same access line that is being provisioned with ADSL or WADSL.

(T)

(C)

For WMVT Service, a device will be installed at the DEUL to filter the WMVT frequency from the Telephone Company's switched or special access service facility. The designated switched or special access service will provide the connection from the DEUL to the WMVT Connection Point.

Transmittal No. 14

ACCESS SERVICE

9.6 Wholesale Multicast Video Transport and High Speed Internet Packet Access (Cont'd)9.6.4 Responsibility of the Telephone Company

- (A) The Telephone Company will determine if the local exchange or dedicated service line is suitable for use with WMVT Service. WMVT Service will not be provided on lines that the Telephone Company determines are not suitable or capable of a minimum of 4.2Mbps downstream bandwidth or on lines that produce interference with other services provided by the Telephone Company. (T)
- (B) The Company will provision WMVT service over 2-wire, 4-wire, non-metallic (fiber), or dedicated service line to the DEUL in order to provide the broadband capacity needed to deliver the video stream(s) and one (1) high-speed data stream capable of providing internet access at download speeds up to 3.0Mbps and upload speeds up to 768kbps based on available facilities, the type of facility, the cable distance from the DEUL, and the physical condition of the plant. (C)
- (C) The Telephone Company will provision and maintain WMVT Service from the WMVT Connection Point to and including the Network Interface Device at the DEUL. The retail video provider or its customer is responsible for providing compatible CPE and inside wire.
- (D) The Company reserves the right to temporarily interrupt WMVT Service for wire center maintenance, system wide software updates, in emergency situations without prior notice, and as described in Tariff F.C.C. No 1, Section 2.1, preceding.

9.6.5 Responsibility of the Customer

In addition to the regulations described in other sections of this tariff, the following provisions apply to WMVT Service:

- (A) Local exchange or dedicated service purchased from the Telephone Company at the DEUL is required for the provisioning of WMVT. The Telephone Company will automatically disconnect WMVT Service when the associated local exchange or dedicated service is disconnected for any reason.

Transmittal No. 14

ACCESS TARIFF

9.6 Wholesale Multicast Video Transport and High Speed Internet Packet Access (Cont'd)9.6.6 Rate Regulations (Cont'd)(A) Rate Application

- (1) A recurring rate is charged for each service based on the commitment level as described in Section 17.4.6(A).
- (2) A nonrecurring rate applies for the installation of each WMVT service.
- (3) The access order charge as described in Section 5 of this tariff will not apply to WMVT Service.
- (4) A nonrecurring change charge applies for re-configuring a WMVT service to add or remove high-speed internet access capability.
- (5) Rates are shown in Section 17.4.6 following.

(B) Volume Discount Plan (VDP)(1) Description

The WMVT Volume Discount Plan (VDP) provides discounted rates based on commitments of minimum volumes. The VDP discount is based on all of a retail video provider's WMVT Services subscribed. The video retail provider must choose a commitment level as designated in Section 17.4.6 (A) for WMVT. The minimum quantity of units from the commitment level subscribed to must be reached within 36 months of the first WMVT installation. This 36-month period is also referred to as the initial startup period. At the end of the initial startup period, if minimum volumes fall short, a shortfall liability will be applied as described in (C)(3) below. The initial startup period applies only once per retail video provider and only to their initial VDP.

(C)

(C)

WMVT service is offered under the VDP at wholesale rates to retail video providers. WMVT service is not a service that the Company provides at retail rates and, accordingly, is not subject to the rate provisions of Sections 251(c)(4) and 252(d)(3) of the Communications Act.

Transmittal No. 14

Issued: November 16, 2004

Effective: December 1, 2004

Brian H. Strom, President - CEO
SureWest Telephone
200 Vernon Street
Roseville, California 95678

VDP is available for a term of 3 (three) years with varying commitment levels for the number of WMVTs.
